<p style="text-align: right;">Page 21</p> <p>1 you producing anything else at the Little 2 Falls plant? 3 A No. 4 Q How many tablets per month are you 5 making currently at the Little Falls plant? 6 MR. ANDERTON: Objection. 7 I instruct the witness not to 8 answer. 9 MR. THOMPSON: And -- okay. 10 MR. ANDERTON: That's specific 11 production information relating to a 12 product other than Digitek. 13 BY MR. THOMPSON: 14 Q And I assume that they're using 15 pressing techniques. Are you using tablet 16 presses to make this product? 17 MR. ANDERTON: Objection. 18 I instruct the witness not to 19 answer. 20 BY MR. THOMPSON: 21 Q Have you altered your tableting 22 process in any way from the time that this 23 plant was shuttered until it's currently been 24 reopened?</p>	<p style="text-align: right;">Page 23</p> <p>1 BY MR. THOMPSON: 2 Q And the absence of a weighing device 3 is evidence of a failure to use good 4 manufacturing procedure; is that right? 5 MR. ANDERTON: Objection. 6 You may answer. 7 THE WITNESS: I don't know. 8 BY MR. THOMPSON: 9 Q In the absence of an ability to 10 weigh the product as it comes off, do you rely 11 on a visual inspection to notice whether or 12 not a tablet is of proper composition? 13 MR. ANDERTON: Objection. 14 You may answer. 15 THE WITNESS: I would need to 16 know what you mean by "proper 17 composition." 18 BY MR. THOMPSON: 19 Q Well, tell me this: In what ways 20 can a tablet fail to meet specifications? 21 A It may fail due to one of the 22 attributes listed in the master formula. 23 Q Okay. Is it possible that it could 24 be too big or too small?</p>
<p style="text-align: right;">Page 22</p> <p>1 MR. ANDERTON: Objection. 2 You may answer. 3 THE WITNESS: What do you mean 4 by "altered"? 5 BY MR. THOMPSON: 6 Q Have you changed -- for example, 7 let's go down the list. Have you bought new 8 presses? 9 A Yes. 10  11 12 13 14 15 16 17 18 19 Q And that is a function of good 20 manufacturing process, is it not? 21 MR. ANDERTON: Objection. 22 You may answer. 23 THE WITNESS: Yes. 24</p>	<p style="text-align: right;">Page 24</p> <p>1 A Yes, that is possible. 2 Q Is it possible that the active 3 ingredient could be too much or too little? 4 A I don't know. 5 Q Is it possible that it could be too 6 crumbly? 7 A Yes. 8 Q Is it possible that it could not 9 last as long as it should? 10 A What do you mean by "last"? 11 Q I mean, could it over the passage of 12 time, could it fall apart or become less 13 potent? 14 MR. ANDERTON: Objection. 15 You may answer. 16 THE WITNESS: I don't know 17 that. I don't know. 18 BY MR. THOMPSON: 19 Q Now, let's assume that all of those 20 are possibilities. Whose job would it be to 21 check and make sure that the product that 22 you -- well, you're not producing it now. 23 You're in compliance. But let's go back to 24 when you were the director of manufacturing</p>

<p style="text-align: right;">Page 25</p> <p>1 operations. Who would be responsible for</p> <p>2 making sure that those you call them</p> <p>3 specifications are met?</p> <p>4 MR. ANDERTON: Objection.</p> <p>5 You may answer.</p> <p>6 THE WITNESS: The operator</p> <p>7 running the tablet press.</p> <p>8 BY MR. THOMPSON:</p> <p>9 Q Anybody else?</p> <p>10 A Quality assurance inspectors.</p> <p>11 Q Okay. Now, would they inspect every</p> <p>12 pill or how would they do it?</p> <p>13 A They would do it based on their</p> <p>14 approved sampling plan.</p> <p>15 Q Okay. Now, was there any product</p> <p>16 that was produced by the Actavis Little Falls</p> <p>17 plant that was not subject to quality</p> <p>18 assurance?</p> <p>19 A No.</p> <p>20 Q Did the quality assurance physically</p> <p>21 come out into the manufacturing floor and get</p> <p>22 random samples or did the operator select</p> <p>23 samples to send to quality assurance?</p> <p>24 A Quality assurance came to the floor</p>	<p style="text-align: right;">Page 27</p> <p>1 MR. ANDERTON: Objection.</p> <p>2 I instruct the witness not to</p> <p>3 answer.</p> <p>4 BY MR. THOMPSON:</p> <p>5 Q How old were the machines, were the</p> <p>6 Stokes machines that were used to press</p> <p>7 Digitek during the period 2005 to 2008?</p> <p>8 A I don't know.</p> <p>9 Q Did you have between the period 2005</p> <p>10 and 2008, did you have occasion to replace any</p> <p>11 press at the Little Falls plant?</p> <p>12 A I don't recall.</p> <p>13 Q When you say you don't recall, is</p> <p>14 there some document that would jog your memory</p> <p>15 or some document we could refer to that would</p> <p>16 give us an equipment history of these presses?</p> <p>17 A I don't know.</p> <p>18 Q Now, there's nothing magic about any</p> <p>19 of these presses, is there?</p> <p>20 MR. ANDERTON: Objection.</p> <p>21 You may answer.</p> <p>22 BY MR. THOMPSON:</p> <p>23 Q I mean, the presses are</p> <p>24 interchangeable; isn't that right?</p>
<p style="text-align: right;">Page 26</p> <p>1 to take random samples.</p> <p>2 Q Okay. And if I looked, where would</p> <p>3 it tell me how often they came?</p> <p>4 A You may find that in the batch</p> <p>5 record for a particular batch.</p> <p>6 Q Now, let's go back to the oxycodone</p> <p>7 production that you have now. Who is the</p> <p>8 manufacturer of the current presses that are</p> <p>9 being used to make oxycodone?</p> <p>10 A Pharm Tech Korea, PTK.</p> <p>11 Q Do you recall the presses that were</p> <p>12 used at the Little Falls plant prior to it</p> <p>13 being -- prior to it ceasing production in</p> <p>14 2008?</p> <p>15 A Yes.</p> <p>16 [REDACTED]</p> <p>17 [REDACTED]</p> <p>18 [REDACTED]</p> <p>19 [REDACTED]</p> <p>20 [REDACTED]</p> <p>21 BY MR. THOMPSON:</p> <p>22 Q And who manufactured the presses</p> <p>23 that were used for products other than</p> <p>24 Digitek?</p>	<p style="text-align: right;">Page 28</p> <p>1 MR. ANDERTON: Objection.</p> <p>2 BY MR. THOMPSON:</p> <p>3 Q So when Mr. Anderton tells us that</p> <p>4 you're directed to answer only as to Digitek,</p> <p>5 any of the presses at the Little Falls plant</p> <p>6 can be set up to press Digitek; isn't that</p> <p>7 right?</p> <p>8 MR. ANDERTON: Objection.</p> <p>9 You may answer.</p> <p>10 THE WITNESS: Only certain</p> <p>11 presses could be set up for Digitek.</p> <p>12 BY MR. THOMPSON:</p> <p>13 Q And what would be the reason that</p> <p>14 some could and some could not?</p> <p>15 A We would use for Digitek the</p> <p>16 45-station press.</p> <p>17 Q Now, I've seen that in the</p> <p>18 documents. I don't know what 45-station -- I</p> <p>19 know what I think it means, but I'm going to</p> <p>20 ask you, what does that mean?</p> <p>21 A There are actually 45 stations on</p> <p>22 the press that will compress a tablet.</p> <p>23 Q Are you saying there are 45 points</p> <p>24 at which you can generate a pressing force to</p>

December 16, 2009

<p style="text-align: right;">Page 29</p> <p>1 make a tablet --</p> <p>2 A Yes.</p> <p>3 Q -- on that machine?</p> <p>4 A Yes.</p> <p>5 Q And does that mean that each time</p> <p>6 you close the press, you make 45 tablets?</p> <p>7 A What do you mean by "close the</p> <p>8 press"?</p> <p>9 Q When I say "close," I mean when you</p> <p>10 engage the press. Each time it exerts force,</p> <p>11 does it make 45 tablets?</p> <p>12 A It makes one tablet at a time in</p> <p>13 each of the 45 stations.</p> <p>14 Q Now, the presses that are not used</p> <p>15 to make Digitek, you described these as</p> <p>16 45-station, what are those?</p> <p>17 A They were smaller presses.</p> <p>18 Q When you say "smaller" --</p> <p>19 A Less stations.</p> <p>20 Q Less stations. Is it less force?</p> <p>21 A No.</p> <p>22 Q When you say "less stations," how</p> <p>23 many?</p> <p>24 MR. ANDERTON: Objection.</p>	<p style="text-align: right;">Page 31</p> <p>1 BY MR. THOMPSON:</p> <p>2 Q Just in terms of numbers of pills,</p> <p>3 numbers of tablets per month.</p> <p>4 MR. ANDERTON: Objection.</p> <p>5 You may answer.</p> <p>6 THE WITNESS: I don't know</p> <p>7 about tablets per month.</p> <p>8 BY MR. THOMPSON:</p> <p>9 [REDACTED]</p> <p>10 [REDACTED]</p> <p>11 [REDACTED]</p> <p>12 [REDACTED]</p> <p>13 [REDACTED]</p> <p>14 [REDACTED]</p> <p>15 Q And which -- was any other drug</p> <p>16 bigger than that?</p> <p>17 MR. ANDERTON: Objection. I --</p> <p>18 BY MR. THOMPSON:</p> <p>19 Q In terms of batch size.</p> <p>20 MR. ANDERTON: Objection.</p> <p>21 I instruct the witness not to</p> <p>22 answer.</p> <p>23 MR. THOMPSON: Oh, I realized</p> <p>24 that that's a very final statement.</p>
<p style="text-align: right;">Page 30</p> <p>1 You may answer.</p> <p>2 THE WITNESS: I don't recall.</p> <p>3 BY MR. THOMPSON:</p> <p>4 Q Did you have any bigger than 45</p> <p>5 stations?</p> <p>6 A No.</p> <p>7 Q What is the drug that you made the</p> <p>8 most of at Little Falls between 2005 and 2008?</p> <p>9 MR. ANDERTON: Objection. I</p> <p>10 instruct the witness to answer only with</p> <p>11 respect to Digitek. If you can answer</p> <p>12 that question limited to Digitek, then</p> <p>13 you may.</p> <p>14 MR. THOMPSON: Well, let me ask</p> <p>15 it another way.</p> <p>16 BY MR. THOMPSON:</p> <p>17 Q Isn't Digitek the largest single</p> <p>18 tableted pharmaceutical that was made at the</p> <p>19 Little Falls plant in terms of numbers?</p> <p>20 MR. ANDERTON: Objection.</p> <p>21 You may answer.</p> <p>22 THE WITNESS: Define "largest"</p> <p>23 for me.</p> <p>24</p>	<p style="text-align: right;">Page 32</p> <p>1 BY MR. THOMPSON:</p> <p>2 Q So when I ask you was Digitek the</p> <p>3 largest number of tablets produced by the</p> <p>4 Little Falls plant, your answer is you don't</p> <p>5 know; is that right?</p> <p>6 A Yes.</p> <p>7 Q And when I ask you -- well, let's go</p> <p>8 on from there. I've gotten ahead of myself.</p> <p>9 I've gotten off track because I'm so</p> <p>10 interested in so many things. But I'm really</p> <p>11 early on looking at your resume. And I'm</p> <p>12 struck once again by the fact that you sum up</p> <p>13 a very broad and very important job with one</p> <p>14 line of description. Is there any reason for</p> <p>15 that?</p> <p>16 MR. ANDERTON: Objection.</p> <p>17 You may answer.</p> <p>18 THE WITNESS: This is not my</p> <p>19 resume.</p> <p>20 BY MR. THOMPSON:</p> <p>21 Q Well, where did the information for</p> <p>22 this come from if not from you?</p> <p>23 A It came from me.</p> <p>24 Q Okay. So when you were asked to</p>
